Portfolio : archi-priya.netlify.app

EDUCATION

Master of Computer Applications (MCA) Banasthali Vidyapith, Rajasthan Current SGPA: 9.46	2025 – 2027
Bachelor of Computer Applications (BCA) Banasthali Vidyapith, Rajasthan CGPA: 9.32	2022 – 2025
Diploma in Audio Engineering — Banasthali Vidyapith	2023 – 2024

WORK EXPERIENCE

Backend Developer Intern — Onyatrips May 2026 – Present

- Optimized API performance using Promise.all(), reducing sequential database calls across feedback, booking, and review routes.
- Built reusable pagination and caching utilities used across 5+ API endpoints.
- Implemented response-time monitoring middleware and improved API scalability through load testing and optimization.
- Developed a Wishlist/Saved Properties backend system with full CRUD operations.
- Reduced API payload size through selective field queries and booking route optimization.

PROJECTS

Wanderlust — Full Stack Property Listing Platform

Node.js | Express.js | MongoDB | Passport.js | Cloudinary | Leaflet.js | EJS

GitHub : github.com/archipriya03/Wanderlust | Live : wanderlust.onrender.com

- Built Airbnb-style listing platform with full CRUD, user auth via Passport.js, and ownership-based authorization middleware.
- Integrated Cloudinary for cloud image uploads and Leaflet.js for interactive maps.
- Implemented MVC architecture, session management, flash messages, and input validation.

RBAC System — Role-Based Access Control API

Node.js | Express.js | MongoDB | JWT | bcrypt | REST API

GitHub : github.com/archipriya03/RBAC-nodejs | Live : rbac-nodejs.onrender.com

- Implemented three-tier role system (3 users roles - Admin, Manager, User) with JWT-based stateless authentication and bcrypt password hashing.
- Built role-checking middleware chain: authenticate → authorize(role) → handler.
- Designed RESTful API with proper HTTP status codes, input validation, and centralized error handling.

SwasthyaSetu – Digital Health Record Management System for Migrant Workers

MongoDB | Express.js | React.js | Node.js | RBAC | JWT Authentication | REST APIs

- Developed a centralized platform for securely managing and accessing migrant workers' health records. Patient registration, medical history management, and health record retrieval features.
- Designed RESTful APIs and optimized MySQL database operations for efficient data handling.
- Integrated authentication and role-based access control to ensure data security.

TECHNICAL SKILLS

- Languages:** Java (Strong OOP), JavaScript, TypeScript
- Frontend:** React.js, HTML5, CSS3, EJS
- Backend:** Node.js, Express.js, REST APIs, JWT, Passport.js, bcrypt
- Databases:** MongoDB (Mongoose), MySQL
- Tools & DevOps:** Git, GitHub, VS Code, Postman, Cloudinary, Render, Netlify
- Concepts:** MERN Stack, RBAC, MVC Architecture, API Performance Optimization, Data Structures & Algorithms

LEADERSHIP & ACTIVITIES

National Service Scheme (NSS) Volunteer	2023 – 2025
---	-------------
